from Nick Mastrota, EFE

### **Record of Telephone Conversation**

I spoke with Stella Borucki of the Office of Spills Prevention and Response, California Department of Fish and Game on August 8, 2006. I asked her if she had any information on a wildlife mortality incident that occurred at Chino State Prison in San Bernardino County. She was aware of the incident, but could not say much about it because it was still under investigation. She said that 11 Canada geese were killed. An application of zinc phosphide was made for ground squirrel control on June 19, 2007, the day before the dead geese were discovered. They are awaiting results of pesticide residue analysis.
